

# Balagha

**In software engineering industry there is lack of some important things we see mostly like**

- 1 Problem solving
- 2.Coding pattern /Coding Architecture
3. New technology learning

**We are trying to fix this .**

**Now we are working with problem solving .**

There are two live sessions for problem solving and some contests. Please visit for all links and details about problem solving [Problem Solving](#) .

**We also have some open source projects .**

For more details about open source project please visit [All Projects](#)
